PREFACE

Dear colleagues and friends,

It is our privilege and honor to invite you cordially to the Symposium „Inflammation of the Upper and Lower GI tract: Common Mechanisms and Treatments or Important Differences?“ in Bordeaux (France).

Behind the program of this symposium is a novel concept: In recent years, we have seen important progress in the field of eosinophilic esophagitis (EoE) and there were excellent symposia specifically focused on the topic. In addition, over the last 40 years, there is a long tradition of outstanding IBD symposia especially in the setting of the Falk Foundation. There is a trend to subspecialization in medicine, which is important to provide the optimal expertise to our patients. However, there is a risk that we do not learn enough from each other and that discussing pathophysiology and progress in therapy of a disease during dedicated and separated symposia does not enough stimulate “out of the box thinking” which is mandatory for medical progress. Therefore, we considered another approach when we designed the program of this meeting. We bring renowned and outstanding EoE experts and key opinion leaders in IBD together to discuss common mechanisms but also differences between the diseases.

We will discuss common pathways in pathophysiology, what can be learned for EoE from IBD, what can be learned for IBD from EoE, new treatment options that might be relevant for both diseases but also disease specific treatment options.

We are excited about this novel format and sincerely hope that you share this excitement. We look forward to meet you in the wonderful city of Bordeaux for this exciting symposium. We would like to welcome you for a face to face meeting with opportunities for learning newest insights into pathophysiology and therapy, scientific exchange, but also to meet with friends and colleagues from Europe and all over the world. This may well go along with a glass of excellent local wine!

Looking forward to meeting you in Bordeaux,

David Laharie Philippe Marteau Gerhard Rogler Frank Zerbib
